(54) **Method of managing health and system for performing the same**

(57) A system of managing health comprises a medical terminal, a cellular phone, a satellite, and a medical server. The medical terminal measures health condition of a patient, and generates a measure signal having information concerning the measure result. The cellular phone generates a health information signal having information concerning health condition of the patient by using the measure signal. The satellite is connected to the cellular phone, thereby detecting in real time location of the cellular phone, and generates location information concerning the detection result. The medical server analyzes the health information signal to determine whether or not the health of the patient is normal, and manages health of the patient by using the location information and the analysis result. The system detects location of the patient by the satellite, and thus may send first-aid to the patient when the health of the patient is not normal.

摘要(译)

管理健康的系统包括医疗终端，蜂窝电话，卫星和医疗服务器。医疗终端测量患者的健康状况，并生成具有关于测量结果的信息的测量信号。蜂窝电话通过使用测量信号产生具有关于患者健康状况的信息的健康信息信号。卫星连接到蜂窝电话，从而实时检测蜂窝电话的位置，并产生关于检测结果的位置信息。医疗服务器分析健康信息信号以确定患者的健康状况是否正常，并通过使用位置信息和分析结果来管理患者的健康。系统通过卫星检测患者的位置，因此当患者的健康不正常时可以向患者发送急救。
