(54) **SYSTEM AND METHOD FOR DISPLAYING SURF INFORMATION TO A USER**

(57) This disclosure relates to a system configured to display current surf information to a user on a device worn by the user, track physical surfing activity of the user across multiple surf sessions, and/or alert the user when current surf conditions match previously highly rated surf conditions and/or any user selected criteria based

on surf/weather forecast data. The system may comprise a first device (a watch) worn by the user, a second device (the user's smartphone) associated with the user but physically separate and unconnected from the first device, external resources, and/or other components.
